

Gerry Meade

Limerick

The new Townhouse windows I got from Costello windows are very well sealed, we took out aluminium windows that were in 30 years, also got at Costello's. The house is now much warmer and there are no drafts whatsoever. It is an older house but the new windows have made everything feel much warmer. The doors are the best of quality and are composite door, they are cream and match the windows very well. The builders and the plumber complemented the windows and doors. The builder said he has fitted 3 houses with Costello's windows and highly recommends the company.

The fitters did great job and everything was well sealed when fitted. The fitters were very easy to deal with, they rang the night before and had the job finished when I came home the next day after work. They said to give a ring if I had any problems with the windows. I would highly recommend Costello Windows, they do an excellent product and have a great service.
